Insulating School Pupils.

The scholars at the local Public school were inoculated on Thursday afternoon last by Doctors R. M. Owsen and Dr. B. A. Walton. The pupils to whom had been given the written permission of their parents were the only ones to receive treatment. The scholars were turned loose for the day, following the operation.

Quiet Holidays.

Good Friday passed off very quietly in town here, there being services in several of the churches in the morning. In the afternoon and evening the young folks organized motor parties, travelled to the City, and paid visits to the places of amusement. Easter Monday, as usual here, was a public holiday here, the bank and places of business being closed—even the ditty-box factory having the shutters up.

Notes of Sports.

The local softball situation has cleared somewhat, as the Walter Leaguers began action last week and decided to have 2 teams in the field—Black Hawks and Canaries.

To complete the 4-team league there will be a team, Benedicts, captained by O. Lory; and the Palladians, with Hy Trapp as Der Kaptein, the members of which are as follows:

If these 4 projected teams materialize, and clash, there is every promise that there's a'gin' to be a "warm" summertime in the local sporting circles.

In another column will be found the schedule of games of the proposed league.

Social Credit Notes.

At the Stony Group meeting last week a goodly number were present, with Mr. W. E. Hayes presiding. Delegates from this Group to the convention were called for, and resulted in Mr. Hayes, Mrs. B. E. Wood and Ed Danhauser being elected.

Mrs. Wood gave a very comprehensive address on Lesson 1 on Social Credit, and satisfactorily answered all the interrogations relating thereto.

An appeal was made for funds, to carry on the work of the Group, and a very satisfactory sum was obtained.

The following resolution will be presented to the convention:

Whereas, the time has come when we have no more confidence in the UFA Government or any like party to deal with or put into operation any Social Credit Scheme, and

Whereas the UFA Government has failed to successfully deal with questions of Provincial debts, business conditions, unemployment, and the Living Conditions of the Masses, and

Whereas we firmly believe that a Social Credit Government will adequately deal with these conditions and troubles,

Be It Resolved that this Convention go on record as standing 100 per cent strong in favor of Social Credit and the leadership of Wm. Aberhart and that if Social Credit is elected to power that Wm. Aberhart become Premier and continue to lead.

Builders And Wreckers

Glancing through a little trade magazine the other day the writer came across a short bit of verse entitled "Wreckers," which, in these days and times, is worthy of still wider circulation. So we reproduce it:

I watched them tearing a building down,
A gang of men in a busy town,
With a ho-heave-ho and a lusty yell,
They swung a beam and the side wall fell.
I asked the foreman, "Are these men skilled?"
And the men you'd hire if you had to build?
He gave a laugh and said, "No, indeed!"
Just common labor is all I need.
I can easily wreck in a day or two
What builders have taken a year to do."
I thought to myself as I went my way,
Which of these roles have I tried to play?
Am I a builder who works with care,
Measuring life by the rule and square?
Am I shaping my deeds to a well-made plan,
Patiently doing the best I can?
Or am I a wrecker who walks the town,
Content with the labor of tearing down?

All over this world of ours there are men and women earnestly striving to build—people in governments, in churches, in finance, in industry, in business; statesmen around the League of Nations council table, sitting in international conferences, or engaged in diplomatic negotiations. They are trying to build new out of the wreckage and upheaval of political, economic and social conditions thrown into chaos by the Great War and its bitter aftermath. They are striving to save civilization, and make it a finer thing than anything hitherto known.

But because the times are temporarily out of joint, weaknesses have developed in the economic system, social evils have become multiplied; in a word, because abnormal conditions exist and many people are in difficulties, the "wreckers" have become bold and walk the town blatantly engaged as the easiest of all tasks—that of tearing down. Men and women who never constructed anything, who lack both the ability and the incentive to construct, are buying themselves in criticizing the efforts of the builders, imputing unworthy motives to them, seeking to wreck anything and everything of a constructive nature that is attempted.

Even the best and most patient of people are inclined to be critical and become fault-finders. In fact, how often are people now heard to speak in praise of anything, of any institution, or of any effort that is being put forth? Rather, is it not the general attitude to denounce and attack blame?

The popular thing to-day seems to be to destroy, to wreck. In some countries they are deliberately trying to destroy religion and so to revert to the dark ages; in these and other countries the attempt is being made to deprive people of liberties won through the suffering and bloodshed of past generations. The wreckers would in a day tear down the constructive work of centuries.

There are those, of course, who still hold fast to the faith that is in them, who still believe in liberty as the sacred right of the individual citizen; who hold true to democratic forms of government and trust in the people and hatred of dictatorial autocracies.

Builder or wrecker—which are you? Which class has brought mankind to its present civilization? Which class lifted mankind from the cave-man stage? Which group has developed modern medicine, which is responsible for modern inventions, which built our transportation and communication systems, our modern towns and cities, which brought into being the higher standard of life in this twentieth century? And was it not the wreckers who precipitated the Great War and are responsible for the whole train of evils which have followed?

The builders are still building in the face of enormous difficulties and the opposition of the wreckers; the builders are striving to save civilization while the wreckers would destroy through revolution and bloodshed in order that out of civilization's crash they may reap-golden benefits.

Each of us may well take stock of ourselves, study our present habits of thinking, examine our actions, watch our words—in brief, take a measure of our lives and see whether we are builders, "patiently doing the best we can," or merely wreckers "content with the labor of tearing down."

Indian Did Not Forget

Sends Gift To Lawyer Who Saved His Son In Trial

Sixteen months ago a Nanaimo jury acquitted Andrew Moses, slender Port Alberni Indian, of a charge of attempted murder, a charge laid after an Indian from the west coast of Vancouver Island, who had allegedly stolen Andrew's girl-wife, was stabbed through the heart and saved from death by a young Victoria surgeon.

For two days the jury listened to how Andrew had followed his pretty 18-year-old wife whom he had married according to Indian custom.

When he found her there was a fight and Charlie Sam was stabbed in the heart. Sam's life was in doubt for more than a month but he recovered eventually and Moses went on trial.

When the jury returned its verdict Chief Moses, Andrew's father, broke a two-day court room silence. "I don't forget you," he said to R. L. Maitland, K.C., his son's counsel. "I don't forget you save Andrew's life. Andrew's good boy. You won't forget me."

Recently Mr. Maitland received two eight-foot intricately carved totem poles. What each figure and character denotes he will probably never fully know, but whenever he looks at them he will know that the old chief did not forget.

BROKE HER LEG AGAINST A STAIR

Whilst Hampered by Rheumatism

"Two years ago," writes a woman, "I was suffering with rheumatism in my legs, and when writing upstairs one day just kicked my right foot against the stairs, and broke my leg just below the knee. I was in hospital for four months, and when I came out someone advised me to try Kruschen Salts. I did so, and now I have no traces of rheumatism. I would not be without my daily dose of Kruschen, which I take every morning—half a teaspoonful in warm water."—Mrs. P. B.

The six salts in Kruschen stimulate the liver and kidneys to healthy, regular action; assist them to get rid of the excess uric acid which is the cause of rheumatic pain. When poisonous uric acid goes with its deposits of needle-pointed crystals, there's no doubt about those aches and pains going too!

Want Branch Lines

Plea Is Made For Completion Of Two Branch Lines In Northern Saskatchewan

A plea for completion of two branch lines of the Canadian National Railway in northern Saskatchewan was made before the select standing committee on railways by C. R. McIntosh (Lib., North Battleford). Mr. McIntosh was supported in his request by P. G. Davies (Cons., Athabasca).

At present a branch line runs north from North Battleford, Sask. to St. Walburg, a distance of 90 miles, but the remaining 100 miles to Beaver River Crossing is unfinished. This line was projected originally to join North Battleford with Edmonton. Mr. McIntosh urged the road be completed, and estimated the cost to be not more than \$350,000.

The other line was from North Battleford to Edmonton, via Spruce Lake.

Japan's New Ships

Merchant Marine Fleet Finest Naval Reserve In World

The Japanese are leaving no stones unturned in their expansion to major world power. Their new merchant marine fleet, the finest naval reserve in the world, is speedily dominating Pacific Ocean shipping. One of six new luxury liners being built by Japan has entered service; a fleet of 50 freighters which travel at speed of more than 20 miles per hour, span Tokyo to San Francisco in 11 days with rich cargoes of silk. This constitutes a tremendous saving in time and dollars.

A baby crying for an hour uses enough potential energy to climb to the top of the Washington Monument.

Little Journeys In Science

THE SPECTROSCOPE

(By Gordon H. Guest, M.A.)
Scientists have shown that the earth and every star which can be observed by the telescope, including the most distant, are composed of the same substances. Of course the proportions are different, but the substances are not.

A glass prism in the hands of the great scientist Sir Isaac Newton in 1672 commenced the train of thought that led to this discovery. Newton observed that the prism split up ordinary sunlight into the various colors of which it is composed. The prism was the beginning of a very powerful instrument of science, namely the spectroscope, which was developed about a hundred years later. It is this instrument that tells us that all the suns and planets are composed of the same materials in different proportions.

The spectroscope sees more than our eyes enable us to see. Man can only observe those substances that give off vibrations to which our eyes are sensitive. The spectroscope is sensitive to all vibrations that matter sends out. We cannot see colorless gases, but the spectroscope can. In fact this instrument can see gases so plainly that it can tell one from another. This is because every solid substance and every kind of gas sends out vibrations, each having a rate of vibration of its own. Science has determined the rates of vibration of the various solids and gases of which the earth is composed. When the same vibrations come from other planets and suns scientists know that they are composed of the same materials that are in the earth.

Research Council

Work Carried On By This Body Is Worth Millions To The Farmers

With their work estimated at "tens of millions of dollars" in value to farmers, associate committees of the National Research Council ended their seventh annual convention held at Winnipeg.

Dr. H. M. Tory, president of the council, declared in his winding address that the group had as much of Canada's future in its hands as any other body of Canadian citizens. The work was worth millions to farmers, he declared.

Farwell was said to Dr. O. S. Aamodt, University of Alberta, who will shortly join the staff of the University of Wisconsin. Regretting Dr. Aamodt's departure, the council members extended him best wishes in his new work. Tribute to Dr. Tory's work was voiced by Dr. W. C. Murray, president of the University of Saskatchewan.

Sub-committees were re-established and their chairmen named.

Does Not Want Freedom

Rev. L. D. Stueland has for a constant companion on his motor trips about the Wind River Indian reservation in Wyoming a domesticated wild gack. Seven years ago he captured the bird near Castle Rock, Colo., after it had broken a wing. It soon became a household pet and, although free to leave at any time, returns to its cage each night.

Conference Between Government And Grain Exchange Officials In Connection With Garnet Wheat

While no official commitment was entered into, a conference between representatives of the Winnipeg Grain Exchange and the government in the office of Hon. R. B. Hanson, minister of trade and commerce, proceeded on the assumption that elevator companies will be protected when the separate grading of Garnet wheat becomes effective July 31 next.

The 1934 amendment to the Canada Grain Act excluded Garnet wheat from grades one and two Northern. The exclusion is to arise from the opening of the new crop year. There are now said to be between 50,000,000 and 60,000,000 of bushels of grades one and two Northern which contain Garnet. Elevator companies hold this wheat and are obliged to deliver the quantity according to the grades under which it was taken in. If no provision is made for their protection, they will stand to lose heavily for the reason that this wheat will no longer qualify for its original grades.

The time was devoted to a general discussion of how best the change can be brought about. It may be that the elevator companies will be compensated for the loss in quality which must result from the exclusion of Garnet from these grades. Or John I. McFarland, acting for the government, may accept delivery of all of it on the old grades and then absorb the loss which will result.

While it is clear that the burden of loss will not be placed on the elevator companies, the conference failed to agree upon a method to be pursued.

The grain exchange was represented by Sidney T. Smith, R. T. Evans and Arthur Darby, secretary. With Mr. Hanson was Rod Finlayson, the law officers of the crown and other government officials. Mr. McFarland was not present.

Five Major Errors

Cause Of Motor Fatalities Given By Insurance Company

What causes motor car fatalities? Violation of certain common rules of the road, which are, or should be, known to all, accounts for most of them.

The Travellers' Insurance Company of the United States, in its annual compilation of highway accidents finds drivers guilty of five major errors. Of the 36,000 deaths last year, the report shows, 6,850 were caused by excessive speed, 5,470 by driving on the wrong side of the road, 2,740 by not having right of way, 3,820 by driving off roadway, 2,740 by other reckless driving. Pedestrians erred, too, and are taxed with two major causes in the annual roll of fatalities: 4,310 by crossing streets between intersections and 2,690 by walking on rural highways. These seven causes account for 74 per cent. of the total lives lost.—St. Louis Post-Dispatch.

Feed Wheat Diverted

Say Shipment To U.S. From Canada Go To Flour Mills

United States agents are combing the midwest in a hunt for wheat bootleggers, according to a Chicago despatch to the Herald Tribune.

"Because of the swirling storms of dust which last year covered meagre forage in pastures," the despatch says, "and increased the death rate of cattle, the duty on wheat was reduced from 42 per cent. to 10 per cent. to permit its importation for feeding purposes. Investigators have discovered large diversions of the feed wheat to flour mills."

"The shipment of 400 tons from Canada, according to customs men, has disappeared somewhere in the region of St. Paul, and its obvious destination has caused investigators to wonder how much Canadian wheat ever reached the cattle for which it was intended."

An apple tree is in its prime at about 25 years and reaches its "dog-age" at about 60, figures an agricultural economist.

Likes Antarctic Fare

Lincoln Ellsworth Prefers It To New York Meals

New York restaurants would please Lincoln Ellsworth better if they served sizzling seal steaks or sautéed "fish of penguin." "It's like the wild taste of such meat," said the explorer, back from Antarctica.

"Seal steak is delicious and the only difficulty with penguin was that it took 17 of them to feed my crew. The 'brissal' are the only parts you can eat."

"Penguin eggs, too, are not to be snubbed on a polar menu. They are about the size of turkey eggs and fried or in omelets are fit for any explorer's breakfast."

In New York while making up his mind on plans for another try at crossing the southern back part of the world, Ellsworth is keeping in trim by wrestling daily. "Grueling at 54 and tanned as if he had wintered on a Miami beach, he hopes to return to the Antarctic so that early in November or late in October he can attempt another poleward dash."

To the "so what" minded persons of the general public who look askance at polar expeditions, Ellsworth had this to say:

"There are 5,000,000 square miles in the Antarctic—an area equal to that of Europe and Australia, 90 per cent. of which is unexplored. This area must have all the resources of coal, gold and platinum and any other resource found in any other continent. They may be inaccessible to-day but we do not know what tomorrow will bring."

FASHION FANCIES

799

Ellen Worth offers pattern of this one-piece dress, stitched in box-plate effect. The belt may be adjusted easily to rapidly growing girls. Style No. 780 is designed for sizes 4, 6, 8 and 10 years. Size 8 requires 2½ yards of 35 inch material with ¾ yards of 35 inch contrasting.

Patterns 20c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

The Spring Fashion Magazine is better than ever. Entirely illustrated in color you will find it a very stimulating fashion edition. There are clothes for cruising and clothes to brighten the lives of stay-at-homes. Many delightful little models for the smaller members of the family. Of course, patterns are obtainable for the designs illustrated. Send for your copy to-day, the price is 20 cents.

Due to the large amount of pectin contained in Canadian-grown apples, the juice of Canadian apples may be used in other fruits to give a jelly consistency to jams and marmalades. There is no waste to a good apple, even the pining and the core may be used for jelly.

Follow Definite Routes

Wild Ducks Use Same "Flyways" As Their Ancestors

Wild ducks migrate along routes followed by their ancestors in four definite geographic regions known as "flyways," according to R. C. Lincoln, naturalist of the U.S. biological survey.

Attention has been drawn to his statements by W. S. Ross, R.C. M.L.A., Moose Jaw, president of the Saskatchewan Fish and Game League.

Result of the discovery that ducks follow four separate flyways each spring and fall means that sportsmen along such route will have to protect their own ducks from fellow shooters as the numbers of the birds will not be replenished by ducks from other flyways, according to Mr. Lincoln.

The ducks, he says, are so strongly influenced by their ancestral "lines of migration" that they will continue to follow them even though conditions on route or at the wintering grounds become unfavorable.

If the birds should be exterminated in any one of the four major flyways it would be a long time before that region could be repopulated, he says.

He states there is undoubted evidence that the waterfowl of North America have seriously decreased in numbers and, accordingly, that special precautions must be taken to prevent their extermination.

The four flyways are known as the Atlantic, the Mississippi, the Central and the Pacific.

He: "You know, you're not a bad-looking sort of a girl."

She: "Oh, you'd say so even if you didn't think so."

He: "Well, we're square then. You'd think so even if I didn't say so."

The SNAPSHOT GUILD

More About The Candid Camera

In "candid" photography you must shoot with conditions "as is." That's what makes it fascinating.

Last week we talked about candid photography in general so now let's discuss the personal and mechanical equipment necessary to take candid camera pictures.

First, you must be equipped with a disposition to overcome a few obstacles, for you are going to have them if you are determined to get real candid camera shots. As was pointed out last week, in candid photography you take your pictures "as is."

In candid photography your picture possibilities are limited—or unlimited as the case may be—by the versatility of your camera, but for the average amateur a small camera with an f3.5 lens will give all the speed necessary. A fast "lens plus super sensitive panchromatic film is essential if you are to make your candid camera shots under adverse lighting conditions, in or outdoors. Next in importance is your shutter speed. No, an extremely fast shutter speed is not all-important for candid shots, but obviously it has many advantages.

An ideal combination for your miniature candid camera is an f 3.5 lens for your largest diaphragm opening with the camera's shutter ranging from one to 1/300 of a second. With such a shutter you will also find it equipped for "time" and "bulb" exposures.

Slow shutter speeds are important, for there are occasions when you will find it quite necessary to make your candid shot in the lens wide open and then, to get proper ex-

Upward Swing of Cattle Industry Is Indicated By Reports of High Prices Paid For Foundation Stock

Potatoes For Enslage

Experiment To Be Made As To Their Suitability

For the purpose of preparing and carrying through a detailed program of research on the utilization and marketing of potatoes grown in Canada, an Associate Committee on Potato Research has been appointed, the members of which are officials of the Dominion Department of Agriculture and the National Research Council.

The committee is to inquire into the usefulness of employing potatoes for ensilage. Dr. E. S. Archibald, director, Dominion Experimental Farms, has arranged with Dr. R. S. Hopkins to include with the silage experiments this year the ensiling of potatoes alone and mixed with other crops, and the Division of Animal Husbandry has been requested to keep closely in touch with these experiments and to observe, through actual feeding trials, the results in comparison with cooked and raw potatoes, which will be available to the Potato Research Committee.

The 1934 potato crop of Canada was estimated at about 80 million bushels which was 10 per cent. greater than that of 1933 and six per cent. above the average production for the five year period 1928-1933.

Hanslin, Germany, of Fried Piper fame, is said to have the first non-potatoous illuminating gas supply in the world.

The recent sales of pure bred bulls in Western Canada are being regarded as a definite barometer indicating an upward swing in the livestock industry. Reports reaching the department of agriculture from these sales require careful study. They were held in Brandon, Regina, Calgary and Edmonton.

The prices paid by ranchers for pure bred bulls indicate the confidence they have in the future of the cattle business since these bulls were bought to improve stock on the ranges. In the sales, and particularly in the Calgary sale, higher prices were paid than in former years. One bull in Calgary brought a top price of \$1,500.

Improved demand for high grade live cattle in the United States is chief cause for the demand for pure bred bulls, according to Senator D. E. Riley, a rancher himself and particularly well informed on livestock matters. He regarded favorably many recommendations of the price spreads commission for helping the industry.

The demand for grading bags on the rail is sweeping Canada, according to applications received by the department of agriculture. This is another phase of livestock marketing dealt with in the report although the commissioners did not take a very definite stand on whether it happened since they heard evidence on the subject.

Grading on the rail means grading after the animal has been dressed. This is the practice in Denmark. The practice in Canada has been to grade on the hoof which was the more feasible although admittedly less accurate.

Ovation For Singers

Large Sum Paid Men Who Would Lead Applause

They number about 40 men, mostly Italians. They head together in New York whenever Manhattan's Metropolitan Opera gives a performance. They have no tickets and they need none. A leader passes them in, hugging, at the 39th street entrance before the carriage trade arrives. Inside, they station themselves on either side of the house, as near the stage as possible. Perhaps 15 climb to the tip-top gallery. Upstairs or downstairs their job is the same—to clap.

The horny-palmed gentlemen of the Claque are worried for the winter is that they would no longer be wanted after Herbert Witherspoon takes command at the Metropolitan. The Metropolitan management had nothing to say, for it has never officially acknowledged its professional clappers. Their leader, one Harold Lodovichiotti, was melancholy. Having inherited his job from his father, Claqueur Lodovichiotti he has, trained his men not only to promote enthusiasm at the right time but also to curb it. An inexperienced operator gets a resounding hiss if he applauds at a wrong moment. If the Claque happens to be standing behind him, he may be fairly defenseless when the crowd moment comes.

The Metropolitan pays its Claque nothing—but the singers may buy special services. Caruso rarely sang without a Claque. Gigli had his and Martinielli's top notes still bring cheers from the men at the rail. In the old days singers were known to pay as high as \$1,000 for an evening's "success." Now \$25 will buy a fairly noisy ovation.—Time.

Once Talks To Air

And now we have flying oases. "The Lyons and Forestry of Niagara Falls show, Ontario, saw a live ox from Chippewagon to Oshkosh in Quebec last month, and plans to transport another shortly. A mining company wanted the beasts for rough hauling where their shire ho had.

The oldest complete skeleton of mankind which science has found to study is that of a Neanderthal woman who lived in Palestine, perhaps 75,000 years ago.

JOHN VAN GUILDER.

WORLD HAPPENINGS
BRIEFLY TOLD

Two hundred varieties of peppers are being made in a new factory at Northampton, England, largely for the American trade.

Quarters usually well informed, said a national spokesman is planned this spring or early summer on Germany's re-armament and possible return to the League of Nations.

France's imperial economic conference, the first in the nation's history, closed a four months' session with a "fifteen-year plan" as its major achievement.

A meeting of all Nazi department heads in the famed "brown house" at Munich, Germany, has decided no quarter henceforth shall be shown the Nazi church opposition, it was disclosed.

An invitation to Canadian Boy Scouts to attend a two week jamboree by Polish Scouts this summer on the 25th anniversary of scouting in that country has been received by the governor-general, as chief scout for Canada.

Thirteen men implicated in the recent Venetian revolt, including Mr. Pistokakis, godson of former Premier Eleutherios Venizelos, were sentenced to prison terms ranging from two to 30 years. Nine were acquitted. Pistokakis got 20 years.

Great Britain is quietly mobilizing her civilian forces for defence against gas and bombing attacks; it was disclosed when Colonel E. M. Cowell, director of the British Red Cross in Surrey, appealed for 1,000 men and women for volunteer first aid nursing work at Croydon airport.

More than 160 fighting craft will take part in the royal jubilee naval review off Spithead, July 16. The flags of 12 admirals will be flown and the assembly will constitute the biggest peace-time demonstration of naval strength since the "test mobilization" in the same waters in July, 1914.

Indians Win Appeal

Judgment For \$18,300 Awarded Northern Saskatchewan Band

Judgment for \$18,300 and costs was awarded members of the Mistawasis Indian band, near Leask, Saskatchewan, against the federal department of Indian affairs by Hon. Justice P. E. Angers in exchequer court, according to word received at Prince Albert.

Action for \$20,300 was based on the premises funds of the Indians had been improperly used by the department, contrary to the treaty of 1876. Richard Mulcaster, K.C., assisted by W. G. Elder, Prince Albert, appeared for the Indians at the trial at Prince Albert last fall. R. G. Hamilton, Regina, acted for the crown.

The successful action was based on the contention funds of the Indians were used to provide medical services, purchase stock, pay the farm instructor and for other purposes for which, under the treaty, free provision by the Dominion government had been promised.

The judgment also restrains the Indian agent at Leask from farming on the reserve.

Will A Yard Long

Probate Document Was Sold In London For \$190

The parchment probate of the will of William Harvey, the discoverer of the circulation of the blood, was sold recently in London for \$190. There was a yard or so of crisp parchment, as fresh as when it was granted in the name of Richard Cromwell, Lord Protector of the Commonwealth. The scribe must have taken weeks to print the details of Harvey's many gifts. Harvey died in 1657.

A Body Builder

Mr. James Howarth of R. 21st St., Hamilton, Ont., says: "My appetite is lost, my weight and strength, and courage for the Indians at Leask is lost. My health also affected my business. Dr. Pierce's Golden Medical Discovery cured my lost health. I picked up in appetite. New size, tablets 50 cents, bottle \$1.00. Large size, tablets or liquid, \$1.35."

Marked For Distinction

Royal Society Of Canada Honors With Fellowship 21 Men

The Royal Society of Canada recently announced election of 21 men to fellowships in its five literary and scientific sections. Two of the newly-elected fellows are French-Canadians, the rest English-speaking.

In the French literary and historical section the new fellows are Jean Charbonneau, Montreal lawyer, and Maurice Hébert, Quebec civil servant and provincial government publicist.

In the chemistry and physics section five new fellows elected, among them, Gordon Merritt Shrum, associate professor of physics at the University of British Columbia.

Two new fellows in the geological section are Dr. H. G. Gunning of the Geological Survey of Canada, Ottawa, and Ralph Leslie Rutherford, associate professor of geology at the University of Alberta.

YOUR HANDWRITING REVEALS
YOUR CHARACTER!

By LAWRENCE HILBERT
(Grapho-Analyst)
(All Rights Reserved)

I have often been asked of what practical value is it to anyone to have their handwriting analysed? Well, the more we know of ourselves, our deepest nature, the greater will be our understanding of ourselves, our qualities, characteristics, talents, and the more we understand ourselves, the greater our opportunity of getting on in the world, the better able we are to make friends and keep them. In other words, to be happy, popular and successful. Are you happy?—or are you continually frowning at life, with a constant chip on your shoulders?

Are you progressing in your work?—or are you dissatisfied; a square peg in a round hole; unable to make any real progress in the work you are doing, yet not knowing what to do to effect a change for the better? If you are married, are you contented?—or is discontent and unhappiness creeping in, with perpetual bickering between yourself and your wife or husband?

Do you make friends and keep them?—or are you living the life of an involuntary recluse, unable to enjoy the society and companionship of real friends?

Are you self-confident?—or are you diffident and bashful, restrained from realising yourself to the full because of inner qualms and self-consciousness?

If you go through life without knowing and understanding yourself, your faults and your virtues; your merits and your weaknesses of character and disposition—you will be seriously handicapped.

Graphology helps you to know yourself, to the end that you will realize on your strong points and make the most of them; and shows you the way to overcome the weak traits, so that you will not be handicapped in the race for happiness and success.

Handwriting is not merely a matter of putting your pen to paper. You have to use your brain in order to write. And because the brain is the captain of your body, everything that you do emanates first from your brain. Handwriting is merely the physical expression of the brain impulses. Whatever you are and what you might be if you make the fullest use of your capabilities, are expressed in your writing.

A character analysis from your handwriting will not, of itself, effect a change in you, but it will show you wherein you need to strengthen yourself, and what traits you have but are not utilizing to the full. And knowledge is the forerunner to action.

Would you like to have your character analysed from your handwriting? Have you any friends whose characters you would like to know? The author of these articles will send you a personal delineation. Send specimens of the handwriting you wish to be analysed, stating birth-date in each case. Send 10¢ coin in each specimen, and enclose with a 3¢ stamped addressed envelope to: Lawrence Hilbert, care of Winnipeg Newspaper Union, 375 McDermott Avenue, Winnipeg, Man. All letters will be treated confidentially, and replies will be mailed out as quickly as possible. Please allow at least two weeks for your answer, however, owing to the volume of mail that is coming in.

Since 1929 there has been a steady decline in the per capita consumption of bread in Canada. This, says the statistical report of the industry for 1933 is no doubt due to two factors, viz., the lessened demand resulting from a decrease in purchasing power and the changes in the dietary habits of the people. 2085

POPULAR APPOINTMENT

STANLEY H. YOUNG

Who has just been appointed General Sales Manager of Christie, Brown and Company, Limited. Since returning from overseas, after four years' service with the Canadian Corps in France, Mr. Young has been connected with the company in the capacities of Cashier, Office Manager and District Sales Manager, in Winnipeg and Toronto. He organized and opened branches in the new Western Canada division and since 1933, has been manager of Head Office branch in Toronto. His appointment to General Sales Manager of the company is a popular one in the trade where he is well known.

Mr. Young was born in Sunderland, Ontario, and has divided a hearty interest in community welfare and boys' work. He is a director of the Kiwanis Club of West Toronto, and the Community Y.M.C.A.

Recipes For This Week

(By Betty Barclay)

RAISIN BREAD PUDDING

- 2 large slices bread, cut in cubes
- $\frac{1}{4}$ cups (1 can) sweetened condensed milk
- 1 cup water
- $\frac{1}{4}$ cup raisins
- 1 teaspoon vanilla
- 2 eggs, separated

Cover bread crumbs with sweetened condensed milk and water. Allow to stand 30 minutes. Whip until bread and milk are thoroughly blended. Add slightly-beaten egg yolks, raisins and vanilla. Fold in stiffly-beaten egg whites. Pour into buttered baking dish. Bake in moderate oven (350 degrees F.) thirty minutes, or until brown. Serve six.

HAM AND CELERY LOAF

- 1 package lime flavored gelatin
- $\frac{1}{4}$ cups warm water
- $\frac{1}{4}$ cup vinegar
- $\frac{1}{4}$ teaspoon salt
- 1 cup finely chopped cooked ham
- $\frac{1}{4}$ cups finely chopped celery
- 1 tablespoon scraped onion
- 2 sweet pickles, finely chopped.

Dissolve gelatin in warm water. Add vinegar and salt. Chill. When slightly thickened, fold in remaining ingredients. Turn into loaf pan. Chill until firm. Unmold. Serve in slices. Garnish with crisp watercress. Serves eight.

Teacher asked our young hopeful what came in like a lion and went out like a lamb and he answered: "Father."

SUNDAY SCHOOL LESSON

APRIL 28

THE HOLY SCRIPTURES

Golden text:
Oh how love I thy law!
It is my meditation all the day.
Psalm 119:97
Devotional Reading: Psalm 119:105-112.

The Value of the Scriptures, Psalm 119:7-11. The law, the testimony, the precepts, the commandment, the ordinances of Jehovah—all of these expressions are terms for the Old Testament Scriptures, especially for the sacred Law which they contain. This, the Psalmist declares, is perfect, restoring the soul; sure, making wise the simple; right, rejoicing the heart; pure, enlightening the eyes; true, and righteous altogether.

The fear of the Lord is clean, enduring for ever. "When among the five terms, each clearly significant of the Scriptures, the Psalmist introduces the abstract expression 'the fear of the Lord,' he must mean the awe, the obedience, the discipline and inspiration of the Law whose praise is the burden of his song." (George Adam Smith).

More to be desired are they than gold, yea, than much fine gold. They, with heart aglow, the Psalmist cries, More to be desired are they than honeycomb—the purest of the honey. Sweeter than honey itself, than honey from the comb, Moses' translation. Moreover by them is thy servant warned; in keeping them there is great reward.

Public Works Undertakings

Inclusion Of Railway Equipment In Government Program

Guarantee of equipment securities of the Canadian National and Canadian Pacific-Railways for the extent of \$15,000,000 is a feature of Dominion government legislation of which notice has been given to create employment by public works and undertakings throughout Canada.

Inclusion of the railway equipment works in the government's reconstruction legislation had been forecast but it had been expected the amount would be double the figure named in the resolution. Extension of the public works program launched last year, and other works undertakings are to be included in the measure.

For nearly a year the government has been considering representations from the makers of railway equipment in Canada seeking federal guarantees to cover equipment orders for both systems. Some employment had been created in the Algoma and Sydney steel plants a year ago by the Dominion government guaranteeing the cost of rail orders until such time as the companies took delivery. The equipment orders suggested in early representations had been for around \$30,000,000.

Had No Sentiment

Sentiment apparently has no place in the business philosophy of an East Boston junk peddler—even where a dead horse is concerned. Seven hours after his horse dropped dead on Bennington Street the junk peddler, whose name was withheld, returned with hammer and chisel and removed the animal's shoes. He then went his way, leaving to police the task of arranging removal of the carcass.

A talking clock, giving a three "pip" signal like the B.B.C. model, is the latest device of the postoffice for warning trunk telephone users of the length of the call.

GARDENING

Gordon L. Smith

Lengthening Vegetable Season

It is good business to make several sowings for each vegetable. If this is not done, the maturity of the same time, and there will be a feast or a famine. After all, with such things as radish, spinach, peas, corn or practically everything else, the time they are best eating is when they are fresh, that is just mature, and taken right out of the garden. They must be quickly grown and used immediately when they are the proper size. These vegetables will deteriorate whether they are left in storage or ripening in the vegetable rows. The good gardener, to avoid this, has his vegetables coming along continuously, a few feet of lettuce and baby carrots and beans ready for the table all season. It is a good plan to sow a third of the package, a week or two ahead of the regular time, another third a fortnight later and the balance still later. With some things like peas which must be put in early as they make their growth during the cool weather, two sowings can be made, one at the earliest possible moment and the other ten days later, but by using early, medium and late varieties the season can be extended up to six weeks.

These Flowers Will Grow

It is not any more difficult to grow beautiful flowers than a few rows of common vegetables. Of course there are a few flowers which are hard to grow, delicately shaded Iris and tender stately Lilies which certainly will not thrive on neglected soil, and are also a dozen or so annuals, and a few herbaceous perennials, which require practically no skill and the minimum of attention. The Little Alyssum, for instance, for edging walks or borders. It comes in several sizes up to six or eight inches in height. It will bloom all season and will grow almost anywhere if the dead flowers are sheared off with clippers or even a lawn mower two or three times. Portulaca is another which one can plant and forget. It likes a hot, sunny location and does not want much moisture. It will bloom all summer. The Calendula or Pinks are a little larger. It thrives almost anywhere, though it need not have too much shade. After thinking no more attention is needed. The ordinary dwarf French Marigold is another flower that should not be overlooked by the gardener who has little time to devote to his hobby and also the California Poppy, Cosmos and ornamental Sunflower. This selection will give plenty of bloom and a fair range in color and height. In rough and ready perennials, there are Eranthis, Primroses, practically any of the Daisies, Peonies, Lupine and Oriental Poppies.

A Television Newspaper

Placed In Operation By Radio Committee In Moscow

Called the first television newspaper, the Telechronique has been placed in operation by the Soviet Radio Committee in Moscow. It is really a talking picture film, and is televised from Moscow to be picked up by anyone having the necessary apparatus. Two radio receivers are needed, one to pick up the sound, and the other working on a different wave length, to pick up the vision. It is predicted that television illustrated newspapers will be seen in many countries within two years.

SENATE APPROVES BILL TO COMBAT DROUGHT MENACE

Ottawa.—Sweeping legislative deeds for the Senate recess, the senate gave second and third readings to bills to provide for rehabilitation of drouth and soil drifting areas in the prairie provinces, supply of one-twelfth of the main estimates, and to permit the Bank of Canada to export gold under license as in the case of chartered banks.

The elder statesmen then proceeded to give first reading to measures for a minimum wage, authorizing provision of moneys to meet expenditures and indebtedness of the Canadian National Railways during 1933, changes in the copyright act relating to performing rights in musical work and reducing the cut in civil servants' salaries.

The bill of T. L. Church (Cons., Toronto East), to compel newspapers to publish a list of their shareholders, had a setback. When the measure was read for second reading, its sponsor, Hon. James Murdock (Lib., Ottawa), moved the bill be discharged from the order paper for the day to be placed on the order paper for June 4. The motion carried.

The rehabilitation bill to spend \$750,000 this year and \$1,000,000 annually for a specified period authorizing a solution of the problem of drouth and soil drifting areas in the western provinces, saw Rt. Hon. Arthur Meighen, senate leader; Senator Raoul Dandurand, Liberal leader; Senator W. A. Buchanan (Lib., St. John's), and Senator J. A. Calder (Cons., Regina) take the floor. All agreed the legislation was desirable to fight the menace.

"A large section of our heritage is threatened," Senator Meighen stated, in speaking of drouth and dust storms in the southern portion of Western Canada. "Consequently, he continued, it is part of wisdom to address the problem of trying to find some way of rescuing from this devastation as much of that area as could possibly be rescued."

The problem was not a simple one, and many had advanced solutions, Senator Meighen said. Opinions of those whose judgment ought to be best differed in important features. For the present, reforestation seemed to hold sway in the minds of public men in the United States, but there was grave doubt as to whether or not this solution would accomplish anything in the immediate future.

In speaking of the proposed personnel of the commission, Senator Meighen stated the intention was that the practical work be done by the official, to associate scientific men with those who had actually lived among and wrestled with problems on the land. The commission would devise experimental tests, the cost of which would be met by the moneys provided.

Senator Dandurand believed the bill would be unanimously accepted by the house.

Senator Buchanan declared he looked upon the bill as important not only to western farmers but to the whole Dominion, because if it succeeded in solving the problem it would benefit every person who had an investment in those sections. "If we were to allow the southern parts of Manitoba, Saskatchewan and Alberta, which are affected by drouth and soil drifting, to be abandoned without any effort to reclaim them," Senator Buchanan stated, "the loss to the elevator companies, the railways, the mortgage companies and individuals would run into hundreds of millions of dollars."

"I think," Senator Buchanan said, "the commission will probably find it desirable to make a systematic effort to determine the best means for reclaiming and rehabilitating certain areas, and to this end some studies will probably be undertaken to find out the most suitable uses to which the lands can be put."

Approximately 3,000,000 tons of sugar were exported by Java in 1931.

Price Spread Report

More State Intervention in Business Is Decried

Ottawa.—Creation of a federal trade and industry commission with wide powers of law enforcement, supervision over business and suppression of unfair, unethical commercial practices, was the main recommendation at the price spread commission.

It would be a commission of five men, operating directly under the prime minister in somewhat the same way as the Dominion board of railway commissioners.

"We have been forced by the evidence," the report stated, "to conclude the situation calls for a frank recognition of the necessity of more state intervention in business."

The trade commission would be empowered to:

Enforce the Combines Act to restrain and restore competition.

Regulate industrial monopolies where open competition cannot or should not be enforced. An industry declared monopolistic, exempted from the operation of the Combines Act and automatically come within the supervision of the trade commission.

Sanction and supervise agreements between industrial units modifying cut-throat competition and generally regulate the industry.

Prohibit unfair competitive practices.

Supervise or co-operate in administering laws relating to merchandising and business practices for which no agency exists.

Administer laws to protect consumers.

Regulate security issues for the protection of the investor.

Co-operate with chambers of commerce and boards of trade in development of commercial activities or refereeing of business disputes.

Co-operate with other government agencies, federal, provincial or municipal, in solution of trade problems.

Railway Dining Car Runs

Propose Longer Period of Layover At Winnipeg

Montreal.—A proposed rearrangement of dining car runs between Montreal and Winnipeg will not have the effect of transferring the headquarters of the dining car department from Montreal to Winnipeg but result in the longer period of layover being at the latter city. W. W. Swindon, general superintendent of sleeping and dining service, Canadian National Railways stated, here.

Mr. Swindon was making a reply to Ald. Dave Robson, pro-mayor of Montreal, who stated at a public meeting "May Canadian House will fight to the last ditch any attempt by the C.N.R. to remove dining car headquarters from the two transcontinental trains from Montreal to Winnipeg."

Lake Navigation Opens

First Cargoes Of Grain Vessels Clear From Fort William

Fort William.—Threading their way through a passage cut in the ice field, five vessels cleared from the harbor, loaded with grain and headed "down-lake" with the first cargoes of the 1935 season. Vessels were the Stadcona, Donnacona, Granby, Winnipeg and Saskatoon, owned by the Canadian Steamship Lines.

Sault Ste. Marie, Ont.—Thirteen days ahead of last year, the steamship L. E. Block opened navigation at this port, upbound for Marquette to load ore.

Peat For Fuel

Ottawa.—The Dominion government is looking into a new process of preparing peat for fuel, Hon. W. A. Gordon, minister of mines, told the House of Commons. He said reports about the progress of negotiations with a company interested in the process were not accurate.

Solve Lottery Tickets

Niagara Falls, N.Y.—Postal officials here disclosed that 12,000 Canadian lottery tickets mailed from this city to various parts of the United States have been seized. They believe the tickets were smuggled across the border here and mailed.

JUBILEE TRUST

Here is a picture of Commander J. B. Adkins, who has been appointed secretary of King George's Jubilee Trust Fund in the Mother Country.

Increase In Rates

Railway Commissioners Grant Request For Increase On International Traffic

Ottawa.—The board of railway commissioners has decided to grant the request of the Canadian railways for an increase in rates on international traffic between Canada and the United States. The emergency increases granted U.S. lines by the interstate commerce commission. Increases which range up to seven per cent. and are limited by maximum rates per hundred pounds, will come into effect on April 15.

The board was convinced shippers would have to pay the increases on international traffic in any event. The difference would be that if the board refused the application of the Canadian roads, the increase would all go to the United States railways.

The principal commodities which will be excluded from the increased rates are: Grain, flour, mill products, hay, straw, fruits of all kinds, vegetables, livestock except horses, milk, pulpwood, lumber except certain woods, and fertilizers.

Tax Higher Salaries

Edmonton.—Higher salaries are struck a fresh blow by the provincial government under the terms of a bill to amend the Income Tax Act which was given second reading in the legislature. The act provides for higher levies on those whose incomes, after allowing for exemptions, are in excess of \$5,000 per year.

Progressing Favorably

Edmonton.—Father Charest, of Grouard, Alta., down into Edmonton after having one hand crushed beneath a snowmobile, was reported by hospital attaches here to be progressing favorably. He may be in the hospital for two weeks. Four fingers were amputated.

SETS REMARKABLE SOLO FLIGHT RECORD

Here is Mr. H. L. Brook, British airman, after he had landed at Croydon Aerodrome from Australia. He completed the flight from Darwin to Lympne in 7 days, 19 hours, 15 minutes, thus breaking the record for the solo flight from Australia, held by Mr. C. J. Melrose, by some thirteen hours.

Want Wheat Conference

Propose Meeting To Be Held In Argentine To Discuss Wheat Exports

Buenos Aires.—An invitation to Canadian and Australian farm organizations to send representatives here for a conference to discuss the removal of limitation on wheat exports was sent by the Argentine Co-operative Association. The latter is composed of 25,000 farmers from all sections of the Argentine.

London.—The wheat consultative committee probably will meet in London May 15, it was reported.

The big four wheat exporting countries, Canada, the United States, Australia and Argentina, met in London early in March but failed to reach any agreement for extension of the existing agreement limiting wheat exports, which extends only until July 31 next.

Investigate Auto Industry

Tariff Board To Visit Plants Where Motor Cars Are Produced

Ottawa.—The tariff board will begin the investigation of the automobile industry by visits to the plants which produce motor cars and parts. These visits will likely be made this week, it was learned.

The hearing of evidence will open in Calgary when the board is in connection with the gasoline inquiry. The board had planned going to Calgary early in May but requests have come from those submitting evidence in that city to have the hearing postponed. The board will comply with this request.

While in the west the board will go to Vancouver where hearings will be conducted in connection with both inquiries. Afterwards the board will return to Ottawa and conclude its hearings in this city.

No Wheat Shortage In U.S.

Estimated Production This Year Placed At 625,000,000 Bushels

Indianapolis.—The United States need have no fear of a great wheat shortage resulting from drouth and dust storms, said G. E. Farrell, director of the division of grains of the agricultural adjustment administration, here.

Farrell, who conducted the first of a series of conferences to be held throughout the middle west and west on plans for holding a referendum on continuing the wheat control program, pointed out the estimated wheat production for this year is 625,000,000 bushels, which is the normal consumption of that grain. In addition there is a surplus of 120,000,000 bushels on hand.

Health Conference

Ottawa.—The conference of provincial ministers of health with Hon. D. M. Sutherland, federal minister of pensions and national health, will open in Ottawa, April 25, Mr. Sutherland stated.

RE-ARMAMENT OF GERMANY IS LEAGUE PROBLEM

Geneva.—Germany's re-armament and the whole question of preventing future one-sided repudiation of international treaties was thrust squarely on the doorstep of the council of the League of Nations.

Clarifying the situation confused picture of just what procedure would be followed here, French Foreign Minister Pierre Laval submitted a draft resolution on behalf of the governments of Great Britain, France and Italy, and, on his own behalf backed it up with a strongly worded denunciation of German repudiation of treaty obligations by her military decree of March 16.

Great Britain and Italy supported the French spokesman in no uncertain terms, but Foreign Minister Joseph Beck of Poland promptly challenged the draft's proposition strengthening of the league covenant, and with a scarcely-veiled reference to the Franco-Russian accord said Poland wondered whether certain suggested agreements were not calculated to produce, rather than foster, the peace of eastern Europe.

The draft resolution was couched in such vigorous terms in its expressions that Germany had failed to keep her obligations, and in denouncing unilateral repudiation of treaties agreed as to bring immediately from Berlin semi-official word that if it is approved as it stands the league statesmen might as well abandon entirely efforts to get Germany back into the league.

Message Of Loyalty

Senate Unites With House Of Commons In Address To The King

Ottawa.—The senate united with the House of Commons in the address to the King expressing loyal and respectful congratulations on the 25th anniversary of his accession to the throne.

Rt. Hon. Arthur Meighen, senate leader, as mover, and Senator Raoul Dandurand, Liberal leader, as second, moved that the upper house join in the address passed last week by the commons.

"We, who possibly best of all citizens of the empire," Senator Meighen stated, "know of the blessings that flow from the occupancy of the throne by a person of the character and great common sense of His Majesty the King, are particularly pleased to offer our congratulations. To us who believe that we are of a country wherein the best forms of democratic government have been born, it is a matter of extreme gratification that at a time when the institutions of democracy have been subjected to a continuous and ferocious challenge, as never before in their long history, our institutions, in the full flush of their democracy, are presided over by a monarch such as blesses the British Empire."

"We all join heartily in wishing long life and happiness to His Majesty King George, to his gracious consort, and to members of the royal family," Senator Dandurand said.

Get Leave Of Absence

Toronto.—All war veterans in the employ of the Ontario government will be given leave of absence with salary so they can attend the Canadian corps reunion at Vimy, France, in July, 1926, Premier Mitchell F. Hepburn announced in the legislature.

Protest Coal Price Cut

Edmonton.—Reduction of prices by 50 cents a ton paid by the C.N.R. fuel department to mines in the Coalberg region, was protested in a resolution passed by the legislature, on motion of Chris Pattinson, Labor, Edmonton.

Run Slot Machines

Edmonton.—The ban on slot machines in this province will take effect July 1 next, when similar legislation also will become operative in Saskatchewan, the legislature in committee of the whole decided.

THE NEWS OF STONY PLAIN AND DISTRICT.

Mrs Wm Fuhr and Mrs Florence Goebel left on Friday, to visit friends in the Coast cities. Mrs Goebel expects to return in a short time and re-open her beauty parlor on First ave.

Mr. Geo. J. Bryan addressed the Young Liberal Club in Edmonton on Tuesday Evg. on the subject "Our Problems Are Your Problems."

John and Carl Beiderweden and Alfred Enders, from Concordia College, were holiday visitors this week at their homes here.

Mr Magnus Larson was a week-end visitor in Stony.

A postcard from Mr W Sampson indicates he has been in hospital at Teigmouth for three weeks, and may remain there for two more.

Following the Lutheran service in English at St Matthew's schoolhouse No. 2 last Sunday Evg. by Pastor Kuring, there was a showing of a fine run of slides.

The trustees of the estate of the late John Franks, Carvel district, are arranging for the sale of the stock, implements and goods, the sale to be held Tues. next, April 30th. See posters.

Get your magazines and Sunday papers at the Hayes's Drug Store, Main St., opp. The Sun Office.

BUTTER AND EGGS WANTED at The Royal Cafe.

Brightbank News.

One of the oldtime settlers of this district passed away in Edmonton last week in the person of Mrs Anne Clausen. Deceased was in her 71st year, and had moved to the City several years ago, residing with a daughter.

The funeral was held Thursday, April 18th. Interment took place in Beechmount cemetery; Rev C H Reppert pastor of the Reformed church, officiated.

She leaves to mourn her loss 2 daughters—Mrs W Edgar, Edmonton, and Mrs C Seheideiman, Duffield. 5 sons, Carl, Julius, Harry and George, Brightbank; Paul, of Edmonton.

Holborn Happenings.

Easter is here again with its fashions and fancy bonnets. Practically all the local ladies are sporting new headpieces.

The Movies from Strawberry, shown last week, were sure appreciated. Watch for the announcement of the next show.

The basketball fans are rustling up their tops, in preparation for the coming season.

Sidney Wright had the misfortune to get a kick from a horse, injuring his hip, and laying him up temporarily.

Mr and Mrs Geo Rutall, the Newlyweds gave a dance at the Hall Wed. April 17, which was well attended. Everyone enjoyed themselves to the fullest extent. The happy young couple received many wishes for a happy future.

BIG SOCIAL CREDIT CONVENTION IS HELD IN STONY ON TUESDAY

Representatives from All Over the Constituency Meet in Stony to Transact Business.

All roads led to Stony town on Tuesday last, the day of the constituency convention of Social Credit. Shortly after 11 a.m. the meeting was called to order by Mr W E Hayes, president of the Stony Group, who welcomed the delegates and visitors on behalf of the local Group.

On motion, Mr Hayes was elected chairman of the convention, and Mr Tony Dairmont acted as secretary.

Credential committee: Olaf Ohlsen, Duffield; D Brox of Spruce Grove; W Welwood, Entwistle.

Resolution committee: Mrs R E Wood, Stony Plain; F Francey, Smithfield, S Hancock, Wabamun.

Delegates elected to Edmonton Convention: Mrs Andrews, Wabamun Group; W E Hayes and Mrs Wood, of Stony Plain Group; Mr Welwood, Entwistle Group; Mr Cox and Mr Brett, of Jasper Place; D Brox, Spruce Grove.

During the election of delegates to the Provincial Convention some discussion took place on the advisability of sending a delegate from a zone other than a person who resides in that zone. This matter was settled amicably, and the rest of the afternoon session was occupied by a discussion on the several planks of the platform. These were taken up seriatim, and varied opinions had been expressed before the adoption had been completed.

Mr Anseley was present at the afternoon session and gave an address.

Tuesday, April 30th.

LEADER ABERHART ON SOCIAL CREDIT.

If further proof were needed that Social Creditites were in earnest and 'no foolin', Tuesday evening's demonstration was the answer.

Altho 8 o'clock had been set as the time for the start of the meeting, at 7 p.m. those anxious to hear the glad tidings of great joy from the lips of the Chief Apostle of the Share-Our-Wealth doctrine began filing into the hall, and by 7.30 the auditorium was packed to the stairhead.

When the Aberhart party arrived, they were conducted up the Bank alley and made their entrances up the steps of an emergency exit.

On entering the hall Wm Aberhart, "our new Premier," was given quite an ovation.

Mr W E Hayes presided, and the promptness shown in opening the meeting on time was sure appreciated by those who had been packed in the hall for upwards of an hour.

As the first speaker up, Chairman Hayes introduced Rev W Naybur, who delivered an interesting and very witty speech.

Following him came Mr N Wilmott, of the S. C. Head Office, Calgary.

In his opening remarks Mr Aberhart admitted that he has drawn up no complete plan for Alberta, as yet; remarking "I haven't tried to make a comprehensive plan. I will not be forced forward faster than it can be done."

He found that old time pioneer farmers who have worked hard for 35 and 40 years on the farm and still have nothing, having lost their all by way of 8 p.c. interest, and that in other fields someone is getting the unearned increment represented by the price spread between manufacturer and consumer.

The basic dividend under Social Credit would, he stated, at first, be for Food, Clothing and Shelter; and those that were earning money now could keep their jobs and keep what they were making. Each citizen would go to the State Credit House which would be set up and receive \$25.00 credit. Non-negotiable certificates would be issued by the citizen to pay for Food, Clothing and Shelter. If a

\$10 certificate were issued to a grocer the latter would take it to the banking house and given \$10 credit. It is simply an exchange of credit, he stated. He admitted that it would be a form of inflation; but not dangerous

because a just Price would be fixed for articles, and a Flow of Credit would be maintained. Mr Aberhart would cut out the flow to the "Big Shots" and send it to the people of Alberta.

THE TENDERFOOT

By

GEORGE B. RODNEY

Author of "The Coronado Trail," "The Canyon Trail," Etc.

CHAPTER XVII.—Continued

Peytot giggled at him. "Oh, hell, man! There's no use skrimshin' with us. We found the handanna you dropped when you stuck the pistol in old man Carr's pocket. Coms across?"

"I got the pistol from Mister Dustin's desk," said Peytot. "What now?"

"You come with us," said Jameson shortly.

CHAPTER XVII.

Sheriff Garcy sprang to his feet as Jameson's car stopped outside his office. He had just taken old Carr to a bedroom and seen him tucked away for the night under a dose of Bromide. He ran down the steps and almost jerked Jameson from the wheel. Then he saw Peytot huddled in the back seat.

"What you got, Evan?" he demanded. "This's as bad a mess as I ever saw. Old Joe's quietly crazy. He swears he didn't let me about that shootin' because he can't."

"Is he drinkin' again?"

"He is not but I gave him some dope. Anybody who can throw some light on this blo'it'll be doin' a favor."

"That's what I brought Stone and this man for. Take him inside, Jim."

Garcy drew Peytot forth and gave one indignant sniff at him. "You smell like somethin' the dog buried," he growled. "Where'd you git that stuff from? . . . Peytot crouched and gibbered. "I been pinchin' the people who use that for three years an' now you got the nerve to come right to my office stinkin' of it. Come inside."

Inside the little office, Garcy flung Peytot into a chair and turned to Stone.

"Shoot," he said tersely. "And for God's sake try to git on the target the first shot."

Without a word, Stone laid on the desk the bandanna neckerchief, the Derringer pistol, the piece of cigarettes and the entire one that he had taken from Dustin. Then:

"I reconstruct the affair this way," he said. "Here's what I can swear to. . . . He told them only what he actually knew. . . . That he had

taken those peytoi cigarettes from Dustin's pocket. Then he swung on Peytot, who sat staring dully at him.

"Where did you get this pistol?" he asked shortly. "We know you shot Kane. The smell of the peytoi on the neckerchief gives you away. Where'd you get this pistol from?"

"Unless you want to hang, you'd better talk," said Garcy.

Still Peytot stared at them. Finally he muttered dully:

"I took the pistol from Mist' Sam's desk."

"Whose desk?"

"He means Dustin," said Jameson quickly. "How did you put the gun in Mr. Carr's pocket? Better tell all you know."

"Easy enough," said Peytot. "I slipped in through the back door the minute the light went out. I shot the gun an' stuck it in Mr. Carr's coat. Then I got out before the light came on again."

"Why did you want to shoot a man you never seen?" asked Stone.

"A man you didn't even know."

"Why?"

"I knowed who he was," said Peytot. "Mist' Sam told me. He was a man who come out here to . . . His name's Kane," he said.

"Kane?" said Stone sharply. "Not Kane but Keene."

"Same thing," said Peytot obstinately. "Mist' Sam told me so."

"I see. . . . Stone leaped to his feet with an oath. "This poor fool was played on by Dustin. Dustin holds Carr's note for half the Hour-glass. He wanted the other half that Keene owns. He played on this poor fool. . . . When he jammed the rag and gun in Carr's pocket. . . . Did Dustin tell you to shoot this man?" He wheeled on the shrinking man.

"No, sir. He didn't know I had the gun."

Garcy, whose face was blood-red with astonishment, stared from man to man.

"Why would Sam Dustin be mixed up in a thing like this?" he asked.

"I'll tell you," Stone repeated about the note. He told about his fight with Dustin at Soda Springs.

"There's another reason why he wants the Hour-glass, too," he said. "I'll show you. I've got it in the car."

He almost leaped down the steps to the car and was back instantly with a little canvas sack that he emptied on the desk.

"Gold ore," he said. "From a vein that Kane found on the lands of the Hour-glass. Look at this piece. . . ."

His hand lit on that brown-stained piece that he had picked up by the old camp-fire. The next moment Peytot gave a half-scream and slumped into a heap over the desk.

"Not that!" he shrieked. "For Christ's sake not that! I didn't go to do it. . . . My God. . . ."

And he gibbered and moaned till they thought he had lost what little mind he had.

"There's a lot behind this that we haven't uncovered," said Stone.

"Peytot. . . . His tone rang out sharply. "Where's old man Kane?"

"I . . . I . . ."

"I told you what Buxton said," said Jameson. "That's blood on that stone. . . ."

"I didn't go to do it," quavered Peytot. The sound of his own voice scared him. "Mist' Sam said you'd find it out. . . . Oh God! He knows I never meant it. . . ."

Stone shook his head at the others who stood rose from their seats.

"How'd do you come to do it, Peytot?" he asked.

"I swear to God I don't know," wailed Peytot. "I was layin' by the fire. . . . Mist' Sam had some of them cigarettes. I got 'em from his pack. . . . No, I didn't. . . . He got 'em out and laid 'em by his side and I swiped 'em. . . . Then I went to sleep. . . . When I come to, Mist' Sam was shakin' me and old man Kane was lyn' there with his head all bashed in. That rock was in my hand but. . . . I swear to God, I don't know no more'n you do about a fight. . . ."

"No wonder we couldn't find Kane," said Stone in a half-whisper. "Where'd you bury him?" he asked quietly though the very hair on his head was rising.

"Up there. . . . In Red Water canon," said Peytot vaguely.

Stone turned to Garcy and Jameson.

HAMILTON, ONTARIO

"The whole story hinges on whether this poor fool is telling the truth or not," he said. "If he's tellin' the truth, then old man Kane's been murdered. Get me two ponies at once, Garcy. If it's all right with you, I'll take this poor devil to show him the place. If we find Kane's body then we'll know Peytot's told us the truth and that Sam Dustin is the man we want."

"For the murder of Gerald Keene," quoth Jameson.

Stone laughed and Garcy stared at his heartlessness.

"I got Eggs to give out the false news of his death," he said. "He's not dead and he isn't going to die for some time, I hope. I just want to see what Dustin's game'll be when he hears Kane was killed by Carr."

"What do you reckon'll happen?"

"You can keep a dead man that long. Dustin'll find out that Keene's not dead."

"That's so. I better swear out a warrant against Dustin. You can arrest him, Sheriff, and hold him three or four days so he will not know I've taken Peytot off into the hills."

"That's better. . . . Garcy sat up. . . . 'What'll you charge him with?'"

Stone considered. "I could swear out a warrant for cattle rustlin' but he'd get out on bail. I might lodge a charge of complicity in the shooting at the Silver Dollar. Wait. . . ."

"He emitted a whoop of joy. . . . 'Tvy got him as sure as shootin'." I found him with those doped cigarettes on him and Peytot says he has been supplied with peytoi by Dustin. . . . I charge him with violation of the Narcotic Law. . . . That's a Federal offense as well as a State violation. Grab him on that charge."

Garcy rose tempestuously.

"By God," he said; "I'll do it. It's takin' a big chance. All depends on what you find. If that cur Peytot has told the truth. . . . which I don't believe. . . . then Dustin is in one hell of a mess. If he's lied. . . . and if I arrest the richest cattleman in Seco valley on a false charge, then I'm in one hell of a fix and I'll sure pass it on to you."

"That's all right. . . . Stone grinned. "You get me the ponies and after I've gone, arrest Dustin and don't let him talk or get word. I'll leave at day-light."

They left at dawn with a sand-storm brewing. It began in stiffluffs that started the tumbleweed rolling across the mesa and raised whirling "dust-devils" across the plain. All day they pounded along through the growing storm and made a dry camp at Coyote Crossing. The ponies made no attempt to forage but stood with lowered heads and turned their rumps to the wind that drove the sand like shot and piled it deep in the blankets.

"I'll be clear to-morrow," growled Peytot. "A sandstorm never lasts but three days."

Dawn came clear and cold and

24

"Say, Stone," he said in a burst of incoherence, "do you believe the dead kin come back?"

"What? Come back? Come back from where? Do you reckon any man who's got a warm place in hell would try to come back to this place? Who'd you think you saw, Peytot?"

"It looked to me like old Dad Kane was at that burro's heels. I seemed to see him with a chew of tobacco as big as a lemon in his face an' a short-handled fry-pan

grew with each mile. Old dreams came to him, old visions appeared in a series of broken scenes. For years of use that debating drag had worked on a brain that was never too strong. They were never pleasant dreams. Peytot does not work like that; they were just the horrible phantasmagoria of a partially disordered brain.

Grimacing faces bobbed above a saw-toothed sky-line. They hung to that sky-line with claw-like hands as birds hang to a telegraph wire and they gibbered and moved at him and then ducked behind their menacing claws. A weeping face, the face of old Dad Kane, stared at him from a distant pile of rocks where Stone saw only a coyote yelping. From time to time Peytot wiped the sweat out of his eyes and furtively looked at Stone. How much of these things was real? How much did Stone see?

But Stone rode on through the stirring sands deep in thought. Peytot broke one of his infernal cigarettes into pieces and chewed the fragments as a dog chews an old boot. Suddenly. . . .

A burro lumbered out from the mesquite-tangle and jogged across the trail, a loaded burro with a top-sack of two buckets, a pick and a shovel. . . . Exactly as old Dad Kane used to make up his pack! Peytot could even see the "Squaw-hitch" that held it! That burro was not six paces in front of Stone when Peytot shouted, his voice shrill with terror. Then the unspeakable happened.

Stone rode straight through that burro as a man rides through smoke. Then the burro with his pack disappeared in the sand-laden air and a sudden swirl of yellow dust drove down over the place where he had been.

Peytot shouldered in shrill-voiced terror and Stone turned on him with a hearty curse. He saw at once that something very real was the matter. Peytot's eyes were white-rimmed with fright but there was no sight in them. If he was seeing things then they were things unseen by mortal eyes. His mouth was working and white foam lay in the corner of his mouth.

"My God," he said, and his voice broke. . . . "Did you see that? You rode right through him! A loaded burro right in your path and you rode straight through him!"

Stone jerked him from his saddle, swung from his own horse and stood over the cowering wretch.

"This sand-storm's had enough," he growled, "without my havin' to ride the range with a damned fool of a drug-addict. Where's any burro?"

"There's! . . . My God! There he is again."

Peytot's wavering finger swung to a spot; then it bobbed up and down as though following a moving burro. Stone's eyes followed the moving finger and saw, above a mesquite bush, the figure of a burro! For a second he stared at it half-paralyzed, then he realized what it was and he began to laugh; a relieved cascade of shrill-voiced laughter that startled himself.

"It's a mirage, you fool," he said. "Look! Don't you see the line of light under his feet; between him and the ground?"

He picked up a rock and threw it with all his force and it struck ground exactly where the burro stood.

"Some prospectors over in another valley has got in just the right position for his resection to be lifted over to us. Let's go on."

But Peytot would not go on. He hung to Stone's saddle and he babbled wildly as Stone had never heard a man talk before; exactly like a frightened child trying to talk courage into itself.

"Say, Stone," he said in a burst of incoherence, "do you believe the dead kin come back?"

"What? Come back? Come back from where? Do you reckon any man who's got a warm place in hell would try to come back to this place? Who'd you think you saw, Peytot?"

"It looked to me like old Dad Kane was at that burro's heels. I seemed to see him with a chew of tobacco as big as a lemon in his face an' a short-handled fry-pan

Why at 40 You Think You're "GROWING OLD"

It's Frequently Just an "Idea." Not "Old Age." And According to Scientists, May be Something No More than a Touch Of Acid Stomach

At about 40, many people think they're "growing old." They're tired a lot. Have headaches. Stomach upsets. Dizziness. Nausea.

Well, scientists say the cause, in a great many cases, is merely an acid condition of the stomach. The thing to do is simply to neutralize the excess stomach acidity.

When you have one of these acid stomach upsets, all you do is take Phillips' Milk of Magnesia after meals and before going to bed.

Try this. You'll feel like another person. Take either the familiar liquid version of the or the convenient new Phillips' Milk of Magnesia Tablets. Made in Canada.

Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tablet is the equivalent of 1 teaspoonful of the liquid version of Phillips' Milk of Magnesia.

PHILLIPS' Milk of Magnesia

stuck in his boot like he always carried it."

Making Tests For Radium.

Ontario Man Claims Precious Ore. Lie Under His Farm

Photographic plates made, he claims, solely by radium rays reflected through hundreds of feet of rock and earth have convinced John R. Howie, 90-year-old Clinton Township resident, near Grimsby, Ontario, that valuable deposits of pitchblende, and other precious ores lie under his farm.

Metallic articles, such as keys and coins, were placed next the photographic plates in a metal holder which was then buried a few feet under ground with the emulsion side of the plate, facing downward. Next morning the developed plates showed clear images of the metal articles and in some cases radiation of light bands when the plates were buried on certain parts of the farm. The engineers said quite definitely, Howie claims, that these results positively proved the existence of radium deposits, and possibly lead, silver, gas and oil.

Find Butteryfly In Mine

Miners in Frickley Colliery at Yorkshire, England, recently saved a brilliantly-colored butterfly from the mine. They found it one and one-half miles from the pit bottom and 1500 feet below ground. It was thought to have been taken into the mine with straw for the pit ponies. The men carried it to the surface and released it.

Nearly 80,000 sightseers of all nationalities visited London's airport at Croydon in the last year.

RELIEVE PERIODIC PAIN

If you suffer periodic pain and discomfort, try Lydia E. Pinkham's Tablets. In most cases they bring welcome relief. As Mrs. Caroline Newman says: "Your Tablets helped me. Let them help you, too. Ask your druggist."

Mrs. Leonard Chaput, Route 4, Tilbury, Ont. says, "I suffered something terrible. Had such headaches and backaches. I was worn out. Your Tablets helped me. Let them help you, too. Ask your druggist."

The Parliamentary Show.

(By J. S. Cowper.)

The last days of the U.F.A. reign in the Alberta Legislature are like a Donnybrook Fair, with an ex-Minister assaulting a witness who appeared on behalf of the Press, and Edmonton's Mayor being removed from the gallery of the House and prohibited from further entry for calling Mr. O. L. McPherson a liar during the ex-Minister's speech.

The Legislature did not prorogue on Thurs. but adjourned to Sat., and will probably sit all Easter week.

The members have still to dispose of 3 important matters. First is the brace of bills designed to muzzie the press of Alberta. The penalties are ruinous. Fines run at \$5000 if paper is owned by a company, and \$1000 apiece on owner, publisher and editor, if any mention is made of evidence in a divorce or matrimonial or of any proceeding before a judge in chambers.

After 3 days of protests the Atty-Gen. modified the bills so as to permit reports of the final judgments in the action to set aside on grounds of alleged fraud, the divorce obtained by the former Hon. O. L. McPherson, and the appeal in the damage action for seduction of a government stenographer brought against former Premier J. E. Brownlee.

So heated were the feelings that in a discussion over an affidavit made by one of the newspaper witnesses the former Hon. O. L. McPherson was said to have assaulted Chas. E. Campbell, publisher of Edmonton Bulletin, outside the Legislative chamber. Mr. McPherson later made a verbal attack on Mayor Clarke of Edmonton, in the House. When Mayor Clarke called out from the public gallery to the ex-Minister: "You're a liar, and you know it!" he was asked to leave.

CASE AGAINST FRED D. GOEBEL ON A THEFT CHARGE IS DISMISSED

The Complainant Is Assessed by the Magistrate the Court Costs.

At a sitting of the local Magistrate's Court on Saturday, April 13, the Information and Complaint of Mr. A. Shannon, farmer, of Spruce Grove district, against Fred D. Goebel, farmer, of Spruce Grove district, was heard. The charge as laid read, that he did "fraudulently take one hog by taking possession when same was found astray," contrary to Sec. 392 (a) of the Criminal Code of Canada.

Evidence was given by the witnesses on each side; at the conclusion of which Magistrate McCulla adjourned the hearing until Sat., April 20. When the hearing was resumed on that date the Magistrate dismissed the case as against Mr. Fred D. Goebel, with costs of the court given against Mr. Shannon, the complainant.

It was made to appear from the evidence given that the alleged act complained of had taken place some time in the month of October, in the year 1933.

Blueberry Items.

A Social Credit Group was organized at Blueberry Schoolhouse last week. The school was well filled and those who attended listened attentively to Mr. W. B. Hayes and Mrs. R. E. Wood propound the theories and benefits of Social Credit. Great interest was shown by those present, and many important questions were asked and dealt with satisfactorily.

A Group was formed, with 25 signing up. The following officers were elected:

Pres.—Mr. Thos. Robertson
V. Pres.—Mr. L. S. Ingie
Sec.—Tony Dairmont
Delegates to Stony Plain Convention: April 23rd; The three of floors.

M. Zucht, Auctioneer.

Here and There

LT-Col. P. A. Gascoigne, recently retired secretary-treasurer, Canadian Pacific Steamships, has been elected president of the Dominion of Canada Rifle Association at the annual meeting of the Association held recently, succeeding LT-Col. H. C. Crowe, of the Ministry of National Defence.

D. S. Thomson, who has been appointed assistant superintendent, Canadian Pacific Railway, Smiths Falls, was, prior to his promotion, chief clerk in the office of the vice-president and general manager of the railway at Montreal. On leaving to take up his new appointment he was presented with a gold standard railroad watch and a purse of money by his fellow-workers in the office.

Just 166 years ago the first Daily settled in Nanaimo and a few nights ago his descendants, Marjorie and John Daly, celebrated the momentous occasion at a supper dance at the Royal York Hotel, Toronto. This makes the sixth generation of the Daly family continuously resident in Canada.

Sixty-two calls at European ports will be made by the new press "Beaver" class cargo steamers of the Canadian Pacific fleet this summer, according to the season's schedule recently issued by Canadian Pacific Steamships. Crossings will take one and a half days in each direction and will touch at London, Antwerp, and Hamburg.

An appeal to the press to mould public opinion in support of larger grants for medical research, particularly into the causes and control of cancer, was voiced by LT-Governor Bruce of Ontario, at the Royal York Hotel, Toronto, at the banquet which wound up the seventh annual convention of the Canadian War News-Press Association, Ontario-Quebec Division.

Sliding and bear-hunting were combined at the Bales Camp, Metagama, recently, when two women skiers of Toronto, accompanied by a photographer, routed a bear out of his den and stood near while the animal was "shot" by a movie camera.

The Orient with its mystery and allure, its brilliant colors and picturesque scenes, will form the inspiration for the Beas Ball, biggest ball of the spring season, to be held the week after Easter at the Canadian Pacific Royal York Hotel, Toronto. The historic theme for the ball is the great festival at Samarcand held in 1440 to celebrate the Emperor Tamerlane's conquest of India.

Vustical and Literary England, and the England of the great cathedrals will be visited this summer by a party under the leadership of Dr. Alfred Whitehead, organist of Christ Church Cathedral, Oxford. (First part of the tour which will encompass a month has been arranged by Guy Rennie, Editor-in-Chief, with the Canadian Pacific Steamships.)

Had the same research been put into other industries at the time employed in the automobile business, you would not hear so much to-day about the high cost of living, said Col. Frank Chappell, of General Motors, Ltd., speaking at a lunch at the Lord Nelson Hotel, Halifax, recently.

TOWN OF STONY PLAIN.

Notice of Preparation of Assessment Roll.

NOTICE IS HEREBY GIVEN that the Assessment Roll of the Town of Stony Plain, for the year 1935 has been prepared and is now open for inspection at the office of the Secretary-Treasurer from ten o'clock in the forenoon until four o'clock in the afternoon on every day which is not a public holiday, except Saturday, and on that day from ten o'clock in the forenoon until two o'clock in the afternoon; and that any person who desires to object to the entry of his name or that of any other person upon the said Roll or to the assessment of any property or to the assessed value placed upon any property, must within thirty days after the date of this Notice lodge a complaint in writing with the Secretary-Treasurer of the Town.

DATED this 3rd day of April, 1935. JAS. MALLOCH, Secretary-Treasurer.

DRESS MAKING AND PLAIN SEWING.

Apply MRS. WALES, The Old John B. Miller House, 3rd Street, Stony Plain.
